BLUE QUARTZ

Blue Quartz crystal is created from natural quartz infused with cobalt and is said to enhance organization, order, and self-discipline by boosting mental clarity and enhancing creativity and expression. Energy spirals through crystals and is amplified every time it "hits" a facet.

This is a reflection of how our engineering teams operate and how we like our services to be perceived in the market.

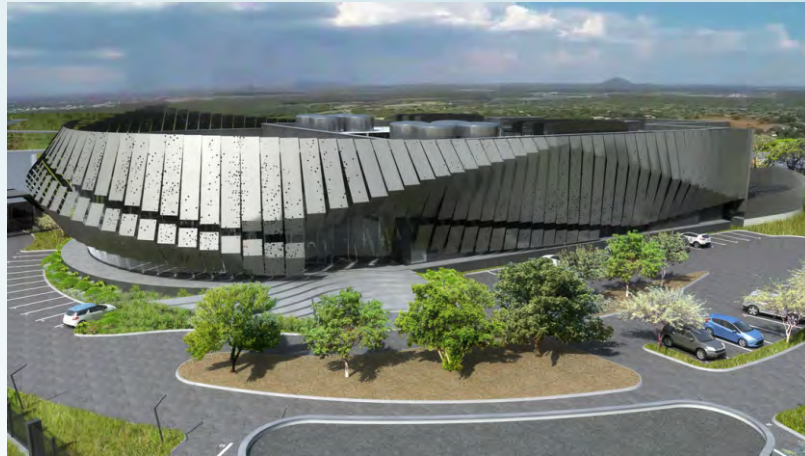

In strengthening our business and skills base and in order to provide our Clients with the best engineering skills in the market Blue Quartz International have strategic alliances with preferred International Partners that add value to our services
